Professional Summary

Full Stack Developer

Aspiring Professional

Aspiring Full Stack Developer skilled in Java and MySQL. Experienced in building responsive web applications using JSP, Servlets, Bootstrap, and Tailwind CSS. Strong understanding of Object Oriented Programming and DSA. Quick learner with a passion for clean, efficient code and intuitive user interfaces.

Technical Skills

Programming Languages: Java, C, HTML, CSS

Frameworks & Technologies: JSP, Servlets, React JS, Tailwind CSS, Bootstrap

Databases: MySQL, Mongo DB

Concepts: Responsive Design, OOP, Data Structures & Algorithms

Education

Asansol Engineering College, MAKAUT

Asansol, West Bengal

Bachelor of Technology in Electronics and Communication Engineering

Expected: July 2026

* CGPA: 7.08 (Current) — Relevant Coursework: Java, Data Structures & Algorithms, Object-Oriented Programming

Burnpur Riverside School, Burnpur, CBSE

Asansol, West Bengal

Higher Secondary (10 + 2)

March 2022

* Aggregate: 70%

Burnpur Riverside School, Burnpur, CBSE

Asansol, West Bengal

Secondary (10th)

March 2020

* Aggregate: 88%

Projects

Job Portal Platform | Java, JSP, Servlets, MySQL, HTML, CSS

2024

- * Architected a comprehensive job portal with separate user and admin interfaces using full-stack Java technologies
- * Designed responsive UI with role-based access control and real-time job listing management
- * github.com/Debanjan83/JOB_PORTAL_PROJECT

Foodie - Food Ordering System | Java, JSP, Servlets, MySQL, HTML, CSS

2025

- * Built a full-stack food ordering platform with dynamic menu management and order processing
- * Developed responsive frontend using Bootstrap and integrated with Java backend for seamless user experience
- * github.com/Debanjan83/FOOD_APP_PROJECT

Electronically Tunable MOSFET-C Meminductor Emulator | LT-SPICE

2025-2026

* Final Year Project:

- Designed and implemented a mathematical and circuit-level emulator to accurately replicate meminductor characteristics and non-linear dynamics.
- Simulated frequency-dependent pinched hysteresis loops to validate theoretical models of memory-dependent inductance.

Key Strengths

Problem Solving: Strong analytical skills with experience in algorithmic thinking and system design

Learning Agility: Self-motivated learner with proven ability to quickly adapt to new technologies

Communication: Multilingual proficiency (English, Bengali, Hindi) with strong documentation skills
